

EC3R Visiting Experts

Dear EC3R colleagues,

We would like to draw your attention to the opportunity of inviting “**international visiting experts**” to Berlin.

Renowned researchers can be invited to Berlin for short-term visits to engage in in-depth scientific exchange. The EC3R will provide reimbursement of travel expenses and accommodation costs.

Interested project groups from within the EC3R can apply to invite an international expert whose expertise can further promote 3R research of excellence in Berlin. The application will be examined by the EC3R steering committee which will decide on issuing an invitation based on scientific excellence and benefits for the local 3R research community.

During this stay, the invited researcher is supposed to hold a **public lecture** with subsequent in-depth discussions. The EC3R will help to organize and to promote this lecture throughout Berlin’s scientific community.

If you are interested in inviting a renowned expert, please see the following structure below.

Proposal (1 – 2 pages), including:

- Inviting project leader (name, affiliation, EC3R project)
- Invited international expert (name, affiliation)
- Relevance of the invited expert for the host institution, the EC3R and Berlin’s scientific landscape in regards to 3R research
- Information on the administrative and organizational support provided by the host group
- Explain briefly which measures will be taken to transfer newly gained insights to the relevant target groups within and outside of the EC3R
- Envisaged period of the short term visit
- Rough estimate of costs

Please attach as an appendix: short Curriculum vitae and a list of max. 10 publications of the invited researcher (max. 2 pages).

A **short report** (1 page) must be submitted to the EC3R within three months after the visit.
